RE: OEM for OSRAM

Dear Rolf,

I would like to inform the OpenADR Alliance that OSRAM will be using [ISY994 Z Series](#), our OpenADR certified 2.0a/2.0b product, as is and without any modifications as a component of their OpenADR offering for “OSRAM ENCELIUM EXTEND Networked Light Management System”.

As such, I am humbly requesting that, ISY994-OSRAM-OADR to be considered as an OEM version of [ISY994 Z Series](#) and included under OSRAM’s certified OpenADR products.

Thank you very much!

With kind regards,

Michel Kohanim
