

Demand Response Technology Incentives for Advanced Thermostats

OpenADR Alliance Meeting

Jonathan O. Burrows

Sr. Program Manager, DR Emerging Technologies
PG&E

June 19, 2014

Commercial Advanced Thermostat Incentive

- Rollout summer 2014.
- Technology assessment runs through the end of 2014.
- Commercial customer can receive \$100 for purchasing and installing a qualified programmable communicating thermostat (PCT).
- PG&E will send the thermostats an AutoDR signal during DR events, but the customer is not required to enroll in a DR program.
- Program utilizes existing contractor channel.
 - Customers must use an approved contractor.
 - 5 Commercial Quality Maintenance (CQM) participating contractors approved for the technology assessment.
 - Contractor may receive an incentive of up to \$300 per thermostat.
- DR requirements for eligible technologies include,
 - VEN* must be OpenADR 2.0b certified.
 - Pass functionality testing at PG&E's ATS lab.

* VEN does not have to be the thermostat (e.g. vendor cloud can function as the VEN).

Residential Advanced Thermostat Incentive

- Currently being developed for rollout summer 2014.
- Joint EE and DR incentive for residential customers that install qualifying programmable communicating thermostat.
 - EE portion available for purchase and installation.
 - DR portion available if customer enrolls in SmartRate™ (residential DR program).
- Thermostats must be able to be self-installed.
- DR requirements for eligible technologies include,
 - VEN* must currently be OpenADR 2.0a compatible,
 - VEN* must be OpenADR 2.0a certified by October 2014,
 - Pass functionality testing at PG&E's ATS lab.

* VEN does not have to be the thermostat (e.g. vendor cloud can function as the VEN).

Thank You
