

ZEN HQ™

THE SIMPLEST ENERGY MANAGEMENT SOLUTION

WITH THE FASTEST PAYBACK

ZENECOSYSTEMS.COM

ENERGY MANAGEMENT SOLUTIONS ARE NO LONGER JUST FOR BIG BUILDINGS

Our mission is to make smart energy practices ubiquitous by providing the most customer-focused energy management solutions available

86%

OF ALL BUILDINGS IN THE USA HAVE NO SMART ENERGY MANAGEMENT

SIMPLE, SMART, CONNECTED CONTROL

Zen HQ™ is so simple, it can be installed within a day

HVAC systems are the largest controllable source of energy drain in commercial buildings, and yet 86% of all buildings in the USA have no energy management solution in place to control them. This is because energy management systems have historically been expensive and hard to install, often requiring complex networks and weeks of installation that disrupt daily business.

Without a way to manage energy, costs can skyrocket.

We've designed our solution, Zen HQ™, to overcome those obstacles. All you have to do is install our smart thermostats that connect to our powerful energy management platform. It takes less than a day, delivers annual savings of up to 30% and can pay for itself in less than a year.

ACHIEVE INSTANT CONTROL ACROSS YOUR ORGANIZATION

Zen HQ™ is a cloud platform for managing HVAC, lighting schedules and energy consumption across multi-site operations. The intuitive user interface helps manage energy via Zen's award winning smart thermostats.

SCHEDULING

You can apply a standard schedule template or customize your own at a National, Regional or Site level.

When creating a schedule, you can select which days the schedule is valid for, and select start and end times in 15-minute blocks.

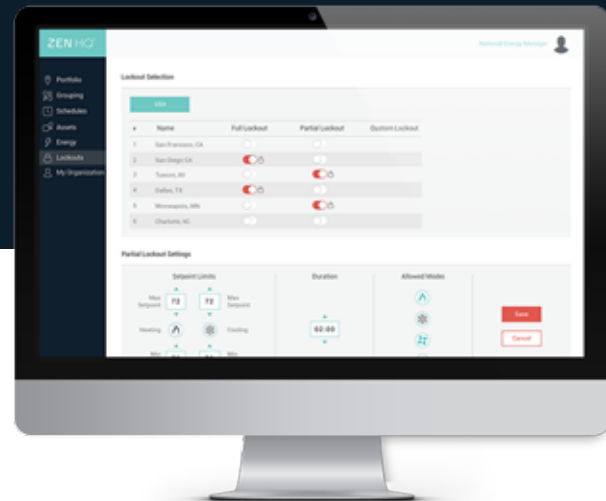

You can then select cooling and heating setpoints for that schedule.

LOCKOUT CONTROLS

One of the most powerful features within Zen HQ™ is the ability to prevent on-site deviations from schedules by using the partial or full lockout feature.

This ensures your organization stays on schedule by preventing unauthorized adjustments.

IMMEDIATE ENERGY
SAVINGS OF UP TO

30%

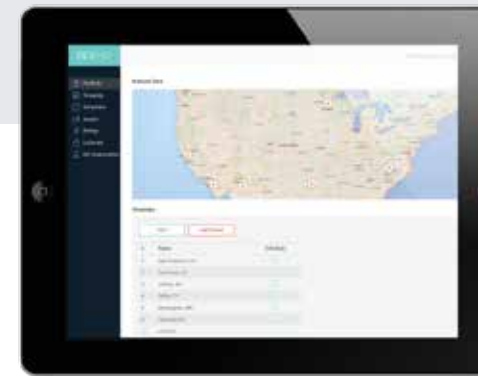

Managing your
energy consumption
has never been easier

DEMAND RESPONSE

Capitalize on utility incentives by participating in demand response and energy efficiency programs.

The Zen HQ™ portal notifies your devices of an active Demand Response event and displays it on your schedule.

INTEGRATED PLATFORM

Combine with lighting, energy and environmental sensors to deliver whole building energy management.

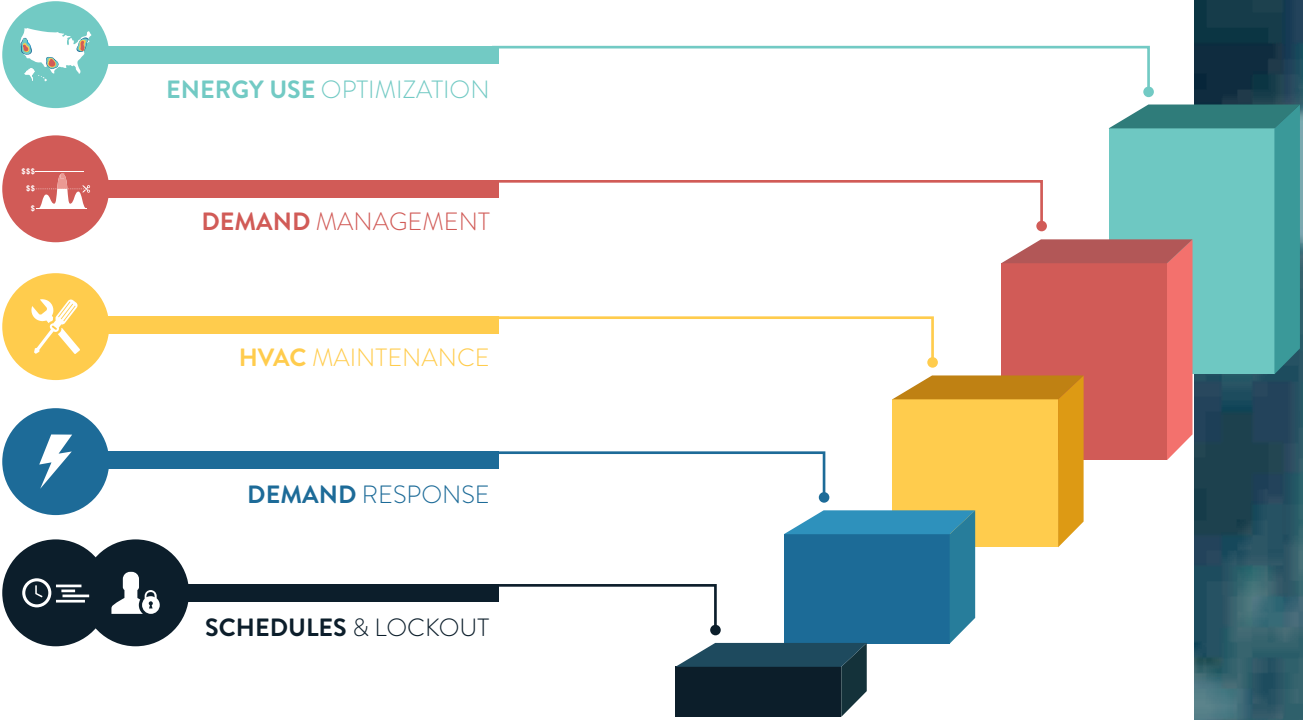

The Energy Monitoring screen presents energy consumption across any site in your organization with a click or a touch.

PAYBACK IN LESS THAN A YEAR

Zen HQ™ allows you to manage HVAC controls, demand response and HVAC maintenance, delivering unprecedented ROI with payback in less than a year.

COMPOUND YOUR ENERGY SAVINGS

The adoption rate of smart energy practices is slow because today's options are complex, expensive and take way too long to payback your investment

JAMES MCPHAIL, CEO

ABOUT ZEN ECOSYSTEMS

Zen provides intelligent energy management solutions to businesses and consumers.

We help you reduce your energy bills and allow you to take control of your energy through simple, connected, beautiful products ranging from our elegant smart thermostat to our powerful Zen HQ platform.

We partner with national brands, distributors, network operators and utilities to bring new energy solutions to market for commercial and residential buildings.

Beyond the significant energy savings we've realized using ZenHQ, we've found the team to be extremely thorough, responsive and a pleasure to deal with
